GeoPDF Map Book

This Sample LEP Map Book has been produced by SIBIZ for Taree Council and utilises GeoPDF technology and is based upon the NSW Department of Planning specifications.

The GeoPDF files contain geo-referenced information and can display coordinates, distances and areas. To access these functions please download the free GeoToolBar plug in from Terrago Technologies www.terragotech.com

The Map Book also contains comprehensive bookmark options for navigation to street intersections and for changing LEP plan types. Bookmarks can be enabled under the View/Navigation Panels/ menu.

The cadastral information has been embedded as data objects and can be searched and analysed. Use the Data Objects Tool available in the Tools/Object Data menu to select the desired land parcel.

Please note that only Map-023 has been constructed completely. The other maps are only included to demonstrate the adjacency links and hyperlink functions.
